General Commands Manual

LS(1)

## NAME

ls - list directory contents

## SYNOPSIS

```
ls [-@ABCDEFGHILOPRSTUWabcdefghijklmnopqrstuvwxyz1%, ]  
[ --color=when ] [ -D format ] [ file ... ]
```

## DESCRIPTION

For each operand that names a file of a type other than directory, ls displays its name as well as any requested, associated information. For each operand that names a file of type directory, ls displays the names of files contained within that directory, as well as any requested, associated information.
