LS(1)                    General Commands Manual                    LS(1)

NAME
     ls – list directory contents

SYNOPSIS
     ls [-@ABCFGHILOPRSTUWabcdefghiklmnopqrstuvwxy1%,]
        [--color=when] [-D format] [file ...]

DESCRIPTION
     For each operand that names a file of a type other than
     directory, ls displays its name as well as any requested,
     associated information.  For each operand that names a
     file of type directory, ls displays the names of files
     contained within that directory, as well as any requested,
     associated information.
```
